

# Filmaften i Rueriet.

## Onsdag 4. marts 2026 Kl. 19:00

**W**hen the days start to get longer again this is the best time for Iceland's riders. In December and March our camera is trained on Iceland's *Hestamen* as they prepare their sports, breeding and trekking horses for the coming season: Riding – that's their winter sport and they are undeterred by any weather. Tölt competitions on ice with the best competitors in the country, but also the growing leisure scene, provide pictures that add an extra lustre to Iceland's many-faceted horse-world. And the crowning glory of all this winter work is seen at the *Landsmót* and on long overland-rides, when the sun disappears on the horizon for only a short while.
